Weight, kg	0.7	0.9	4.5	5.5

Safety cutting head

Safe and precise cutting: Ergonomically designed safety cutting head with rotary knife made of special hardened, high-quality steel.

Protractor

For cuts in a correct angle, models 1030 and 1031 are equipped with a protractor and corresponding marks on the cutting table.

Bracket with scale

This bracket with a useful measuring scale (mm) can be used as front gauge or as backgauge.

Hardened rotary blade

All IDEAL rotary trimmers are furnished with self-sharpening rotary blades made of special hardened, high-quality steel.

Safety cutting head

For precise and safe cuts: ergonomically designed safety cutting head.

Measuring Scale

The measuring scale on the cutting table allows precise alignment of the material to be cut to the desired dimension.

Collection tray

Convenient - the collection tray for trimmings underneath the cutting table is standard equipment for all models with stand.

Precise metal cross bar

The high quality of the metal cross bar for the cutting head of the IDEAL rotary trimmers guarantees excellent results on every cut.

Blades from 'Solingen Steel'

The high-quality upper and lower blades can be resharpened (models IDEAL 1134 - IDEAL 1110).

Backgauge and scale

The format indications printed on the cutting tables allow accurate trimming to the desired size.

Convenient handle

An ergonomically designed handle fits the hand perfectly and guarantees fatigue-free operation.

Cutting line indicator

The red cutting line indicator on the clamp bar enables precise alignment on cutting marks or images for precise cutting results.

¹ Fold-away extension table in working position

EASY-LIFT

The patented paper release lever lifts up the automatic clamp for convenient removal of the paper from the cutting table.

Calibrated rotary knob

The rotary knob allows precise positioning of the front gauge with narrow cutting device to the desired dimensions.

Paper supports

Fold-out paper supports on the front gauge allow precise alignment of the paper to be cut.

Solid blade bracket

Precision blade mounting brackets with double bearings for the blade axle guarantee a long service life and precise cuts.

Blade lever

Effortless cutting: Safety blade lever with ergonomically designed handle and patented overload protection while cutting.

Scale for backgauge

The accurate backgauge and side lays are made from cast aluminium and allow precise alignment of the paper stack.

"Fast flick" action clamp

Efficient cutting is guaranteed by the "fast flick" action clamp. Insert paper stack, throw the lever to tighten – cut.

Safe blade change

Safe and convenient blade change without removing covers. Blade changing device covers cutting edge of blade to protect the operator.

Cutting stick change

Turning or exchanging the cutting stick can easily be managed from the outside of the guillotine without using any tools.

Digital measurement readout

The digital measurement readout allows exact positioning of the backgauge. The indication accuracy of the digital display is 1/10 mm (models 4315 and 4350).

Optical cutting line

The optical cutting line indicator with especially bright and durable LEDs guarantees easy alignment of cutting marks for precise cuts (models 4315 and 4350).

EASY-CUT activating bars

The innovative cutting system with convenient two-hand operation via patented blade activating bars (models 4315 and 4350).

Practical tool holder

The practical hook-in tool holder is placed on the back table and keeps all necessary tools for blade change and service jobs within reach.

EASY-CUT activating bars

The innovative cutting system with convenient two-hand operation via patented blade activating bars.

Optical cutting line

The optical cutting line indicator with especially bright and durable LEDs guarantees easy alignment of cutting marks for precise cuts.

Digital measurement readout

The digital measurement readout allows an exact positioning of the backgauge, which is set by a hand crank.

Transparent safety guard

The electronically secured front safety guard swings out of the way easily and allows safe and convenient cutting.

EASY-TO-USE Touch pad

Extremely convenient: Electronic, programable control module for the power backgauge with multi-lingual touch pad.

Electronic hand wheel

Ideal for manual backgauge positioning, the electronic hand wheel has infinitely variable speed control (from very slow to very fast).

Optional side tables

A set of side tables provides additional storage space and is available for all guillotines starting with model 4815 at an extra cost.
